S-CUT®

Authorized Consumables Package for RTL & RTS

Manufactured
in Sweden by
ES Equipment AB

ACP for RTL & RTS models

The cutting blade on your **S-CUT** is very sharp and cuts through most textile materials. When used the edge might have been blunt and we recommend to rotate the blade for optimal function. Once you have rotated the blade in a full circle and used all the six edges it is worn out and must be changed.

The ACP pack contains four blades and four hygiene supports. Make sure you always have these parts available and also make sure you have a sharp cutting edge ready every time you'll be in a rescue situation.

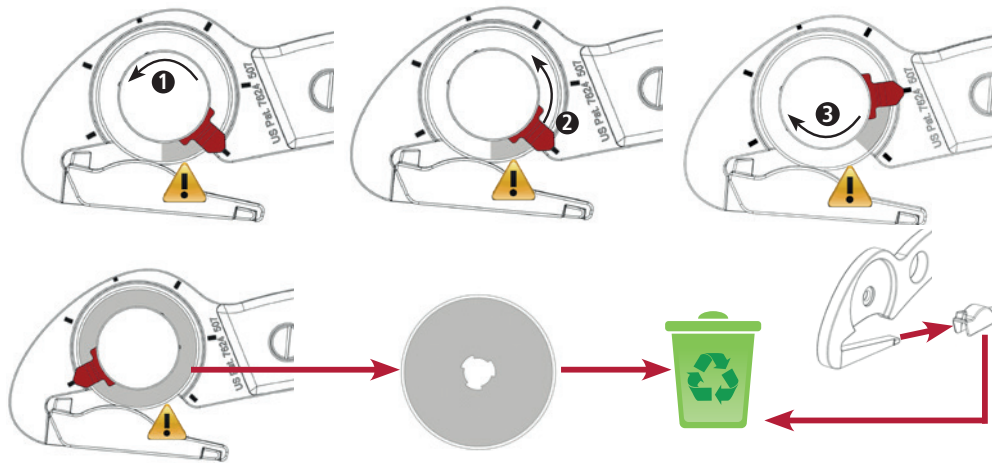

It is very easy to switch blade, just follow the steps below when the cutting blade is worn out. You can also scan the qr code for instructions.

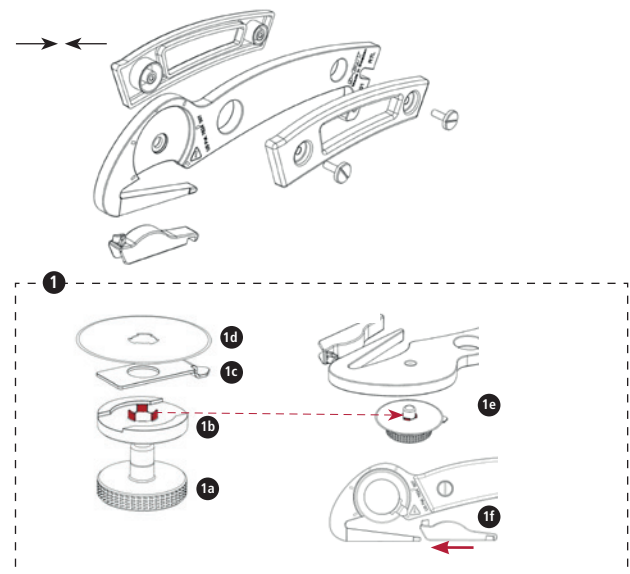

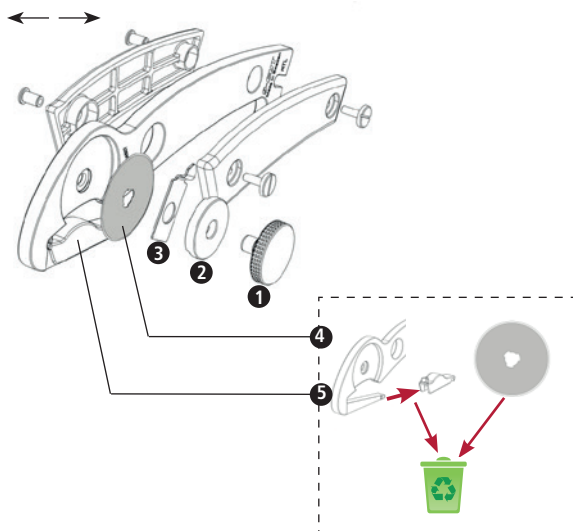

Adjust the cutting edge – change blade and support
